Grading report — for the owner of this card

# Alolan Raichu

WT-0G7N-J4M3

# 9.5

MINT+

## How this grade was reached

An outstanding card, a half point from perfect. Held back by corners, at 8.5. Final grade: **9.5 (Mint+)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

### CENTERING 9.5

MEASURED, NOT ESTIMATED

| FACE | LEFT / RIGHT | TOP / BOTTOM | METHOD | GRADE |
|---|---|---|---|---|
| front | 50.0 / 50.0 | 50.3 / 49.7 | measured by the grader | 10 |
| back | 56.4 / 43.6 | 51.5 / 48.5 | measured by the grader | 9.5 |

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

### CORNERS 8.5

1 ON THE FRONT · 2 ON THE BACK

At this image scale the corner tips resolve to only a few pixels, so I am judging blunting rather than fray. All four look intact with no rounding, but the front top-right and bottom-left tips each show a sub-millimetre pale point that keeps this off a 9.5.

### EDGES 10

1 ON THE BACK

Nothing on this axis shows at the magnification the card was graded at.

### SURFACE 10

2 ON THE FRONT · 1 ON THE BACK

Nothing on this axis shows at the magnification the card was graded at.

## How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

```
950 out of 1000 ÷ 100 = 9.5 rounded to the nearest half point = 9.5
```

## Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

| FACE | LEFT / RIGHT | TOP / BOTTOM | WIDER SPLIT | TABLE RUNG | GRADE |
|---|---|---|---|---|---|
| front | 50.0 / 50.0 | 50.3 / 49.7 | 50.3 / 49.7 | within 52 / 48 | 10 |
| back | 56.4 / 43.6 | 51.5 / 48.5 | 56.4 / 43.6 | within 60 / 40 | 9.5 |

A card is only as well centred as its worse face. Here that is the back, so centering is 9.5.

| FRONT: WORST SPLIT | GRADE |
|---|---|
| **52 / 48** | **10** THIS CARD |
| 55 / 45 | 9.5 |
| 60 / 40 | 9 |
| 65 / 35 | 8.5 |
| 70 / 30 | 8 |
| 75 / 25 | 7 |
| 80 / 20 | 6 |
| 85 / 15 | 5 |
| 90 / 10 | 4 |
| 95 / 5 | 2 |
| any split | 1 |

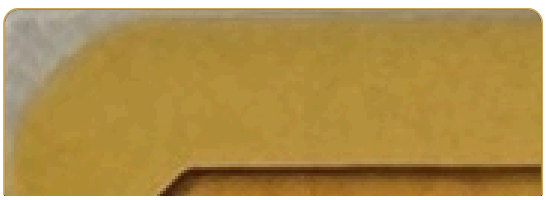

| BACK: WORST SPLIT | GRADE |
|---|---|
| 55 / 45 | 10 |
| **60 / 40** | **9.5** THIS CARD |
| 65 / 35 | 9 |
| 70 / 30 | 8.5 |
| 75 / 25 | 8 |
| 80 / 20 | 7 |
| 85 / 15 | 6 |
| 90 / 10 | 5 |
| 95 / 5 | 3 |
| any split | 2 |

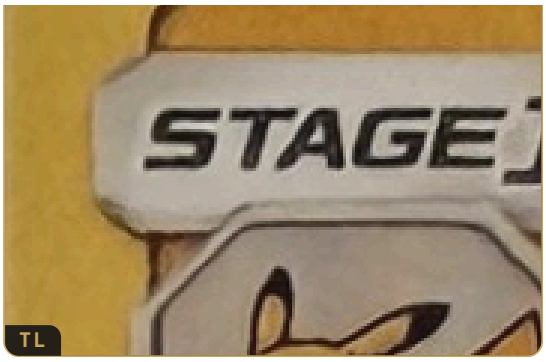

The front is held to a tighter split than the back at every grade.

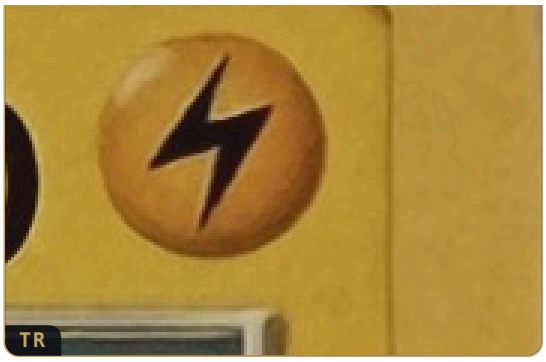

## Corners, at fixed magnification

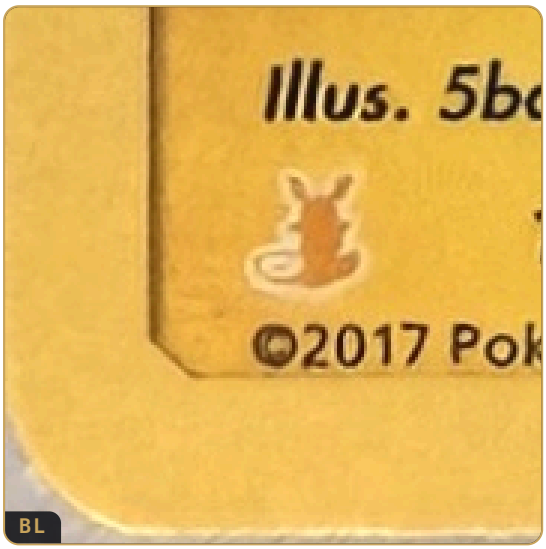

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

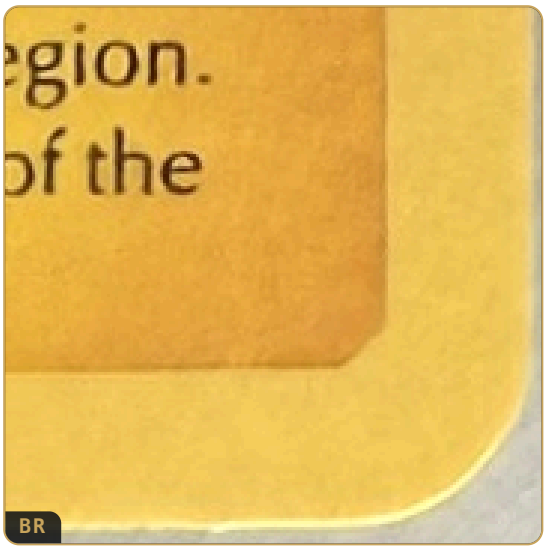

FRONT

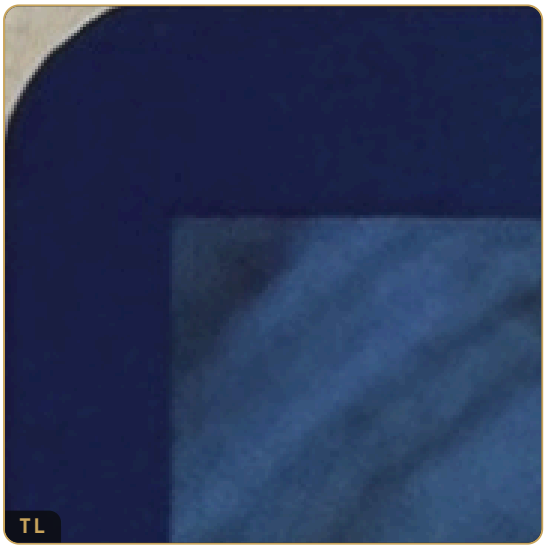

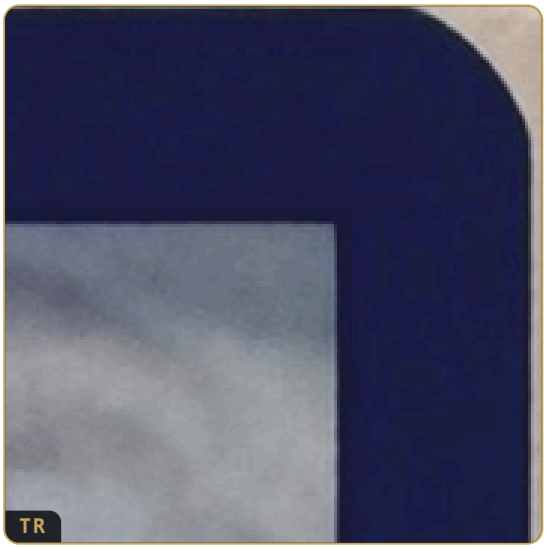

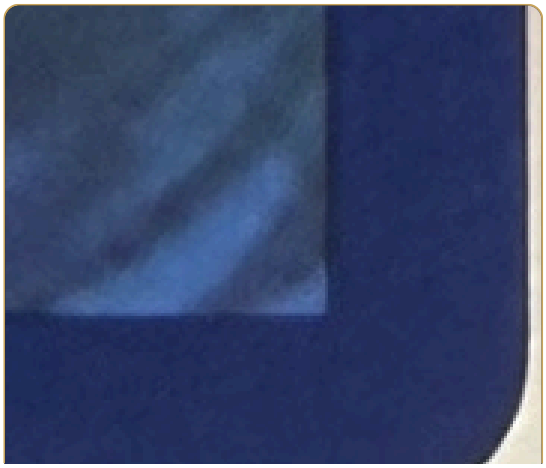

BACK

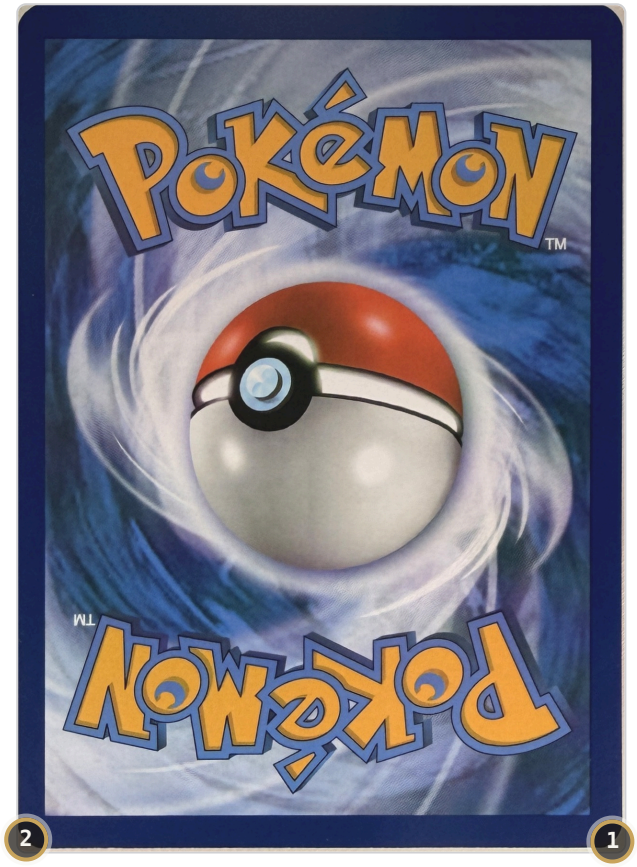

## What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 2 MARKS PLACED BY THE GRADER

1. **Corner Ding** FAINT
   corner ding (faint)
2. **Corner Ding** FAINT
   corner ding (faint)

## Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · whitening** FAINT
  Faint pale line running along the left edge of the yellow border, roughly 20mm long, reading as light edge whitening rather than a clean cut.

- **front · whitening** FAINT
  Bottom-left corner shows a small light spot at the tip of the yellow border, under 1mm.
- **front · corner ding** FAINT
  Top-right corner of the yellow border looks very slightly blunted with a small pale point about 0.5mm across.
- **back · surface scuff** FAINT
  Broad soft light patch across the centre of the Poke Ball on the back; likely lighting but could be a loss of gloss in that area.
- **back · edge chip** FAINT
  Very small pale nick in the dark blue border along the top edge near the top-left corner, roughly 1mm wide.

## Card details

A card of this name and number, out of **30**, exists in the public card catalogue — **SM trainer Kit (Alolan Raichu)**. The details on this certificate match it.

> **This is not a test of authenticity.** It confirms the card is the card it claims to be. A good counterfeit of a real card would match exactly the same way, and the tests that would settle it (light through the core, weight, thickness, surface texture) are laboratory tests, and WinnTCG does not run them. We had this card in our hands and graded what we could see; that is not a statement that it is genuine.

## What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
