

WinnTCG

Grading report — for the owner of this card

Bouffalant ex

WT-8PA3-0YNY

6.5

EX-MT+

How this grade was reached

A card with clear handling. Held back by centering, at 3. Final grade: **6.5 (EX-MT+)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 3

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	64.2 / 35.8	69.8 / 30.2	measured by the grader	8
back	64.4 / 35.6	50.0 / 50.0	measured by the grader	9

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS **8**

1 ON THE FRONT

Light wear, of the kind that shows on close inspection and not before.

EDGES **7.5**

Wear that shows plainly on inspection, without magnification.

SURFACE **6.5**

7 ON THE FRONT · 1 ON THE BACK

Noticeable wear on this axis — chipping, whitening or surface marks that are visible without magnification.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

> 625 out of 1000 ÷ 100 = 6.25 rounded to the nearest half point = **6.5**

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	64.2 / 35.8	69.8 / 30.2	69.8 / 30.2	within 70 / 30	8
back	64.4 / 35.6	50.0 / 50.0	64.4 / 35.6	within 65 / 35	9

The grader filed centering at 3.

FRONT: WORST SPLIT	GRADE
52 / 48	10
55 / 45	9.5
60 / 40	9
65 / 35	8.5
70 / 30	**8** THIS CARD
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

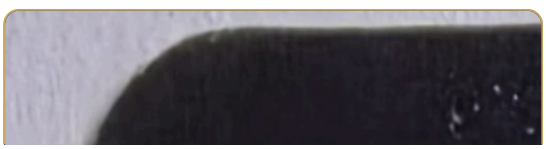

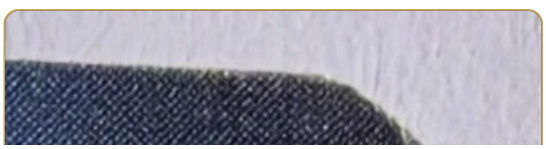

BACK: WORST SPLIT	GRADE
55 / 45	10
60 / 40	9.5
65 / 35	**9** THIS CARD
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

The front is held to a tighter split than the back at every grade.

Corners, at fixed magnification

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

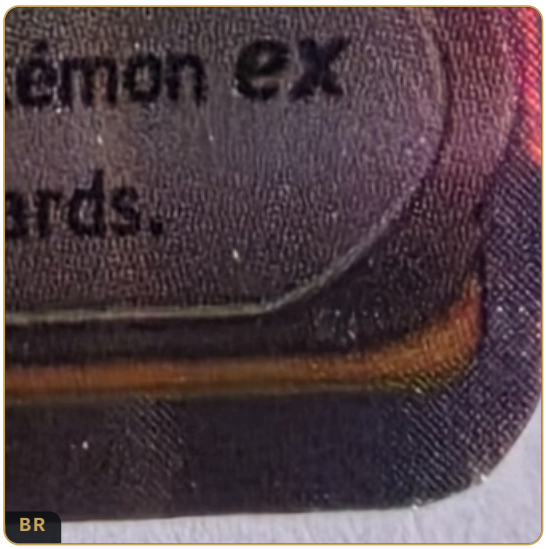

FRONT

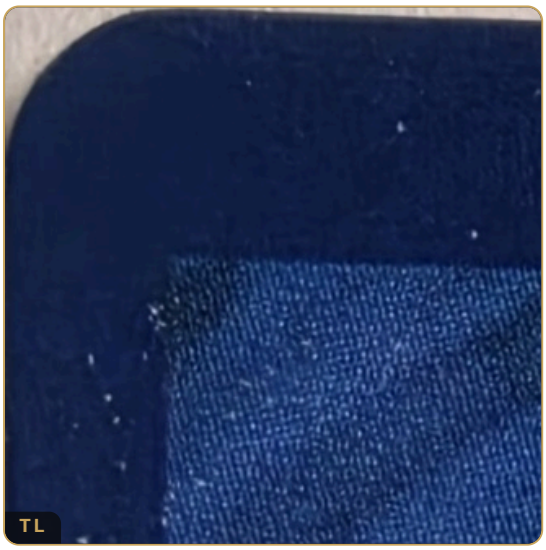

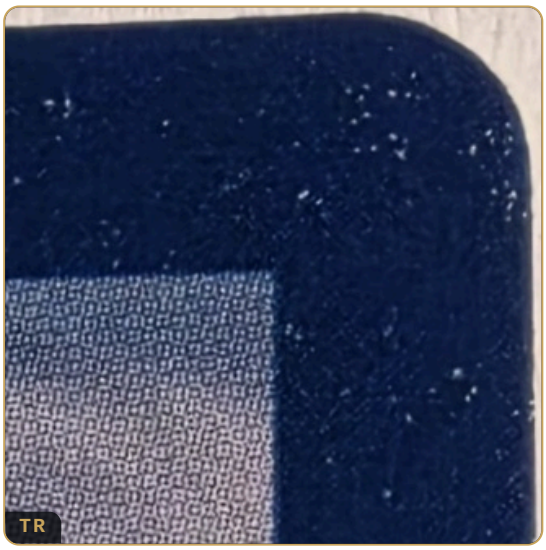

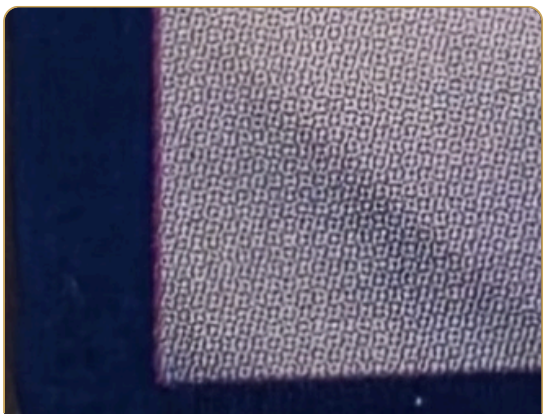

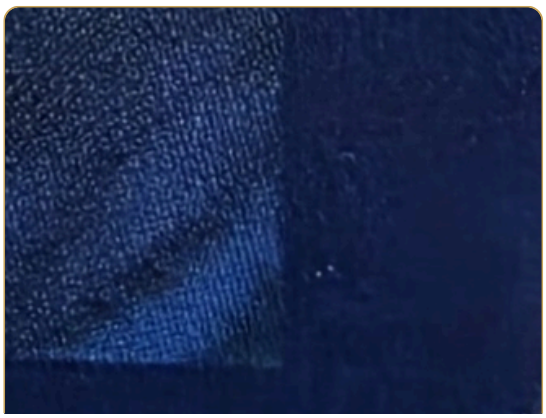

BACK

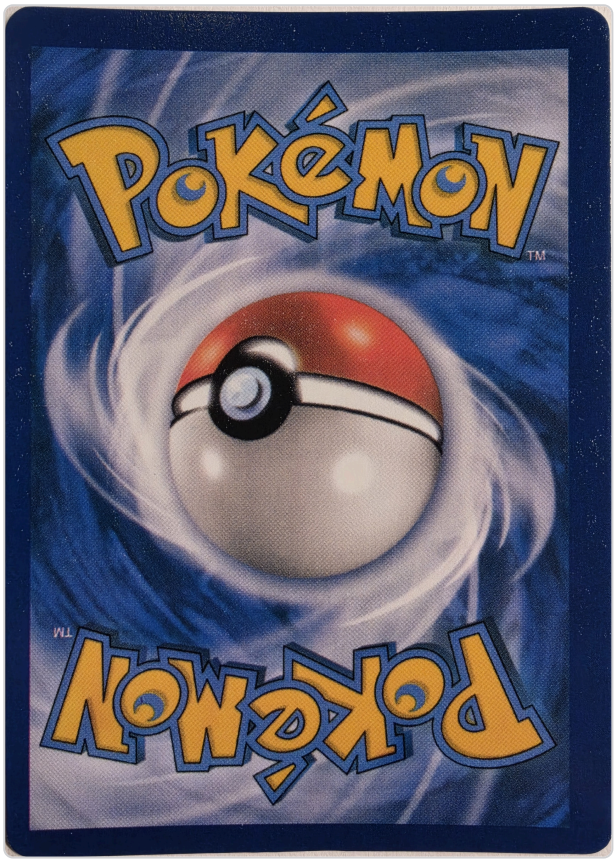

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 4 MARKS PLACED BY THE GRADER

BACK — 0 MARKS PLACED BY THE GRADER

1. **Dent** PROMINENT
   dent (prominent)
2. **Corner Ding** FAINT
   corner ding (faint)
3. **Holo Scratch** PROMINENT
   holo scratch (prominent)
4. **Holo Scratch** NOTICEABLE
   holo scratch (noticeable)

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · surface scuff** FAINT
  Faint short scuff line in the foil along the left side, in the dark shaded band inside the left border.
- **front · surface scuff** FAINT
  Tiny light mark on the foil just below and right of the 220 HP, inside the upper-right border area.
- **front · surface scuff** FAINT
  Small dark speck on the gold foil just above the 'Bouffalant' nameplate, near the top edge left of centre.
- **front · print defect** FAINT
  Scattered pinpoint light specks across the holo foil in the artwork around the horns and body, typical of foil print dust.
- **back · surface scuff** FAINT
  Very light speckling in the blue border along the upper-left area of the back; could also be print texture.

Card details

A card of this name and number, out of **86**, exists in the public card catalogue — **White Flare**, Ultra Rare. The details on this certificate match it.

> **This is not a test of authenticity.** It confirms the card is the card it claims to be. A good counterfeit of a real card would match exactly the same way, and the tests that would settle it (light through the core, weight, thickness, surface texture) are laboratory tests, and WinnTCG does not run them. We had this card in our hands and graded what we could see; that is not a statement that it is genuine.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and

where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
