Grading report — for the owner of this card

□□□□ (Banette)

WT-8SB0-FVBA

8

NM-MT

How this grade was reached

A solid card with visible wear. Held back by surface, at 6.5. Final grade: **8 (NM-MT)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 10

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	50.0 / 50.0	50.4 / 49.6	measured by the grader	10
back	51.3 / 48.7	53.1 / 46.9	measured by the grader	10

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS 8

2 ON THE BACK

Light wear, of the kind that shows on close inspection and not before.

EDGES 7.5

2 ON THE BACK

Wear that shows plainly on inspection, without magnification.

SURFACE 6.5

5 ON THE FRONT · 2 ON THE BACK

Noticeable wear on this axis — chipping, whitening or surface marks that are visible without magnification.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

> 800 out of 1000 ÷ 100 = 8 rounded to the nearest half point = **8**

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	50.0 / 50.0	50.4 / 49.6	50.4 / 49.6	within 52 / 48	10
back	51.3 / 48.7	53.1 / 46.9	53.1 / 46.9	within 55 / 45	10

Both faces measured 10, so that is the centering sub-grade.

FRONT: WORST SPLIT	GRADE
52 / 48	**10** THIS CARD
55 / 45	9.5
60 / 40	9
65 / 35	8.5
70 / 30	8
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

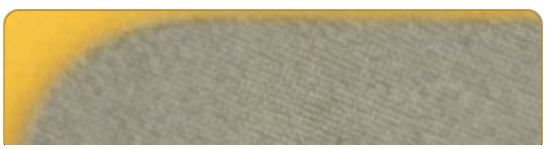

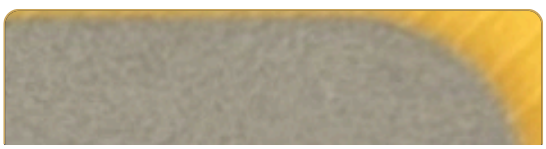

BACK: WORST SPLIT	GRADE
55 / 45	**10** THIS CARD
60 / 40	9.5
65 / 35	9
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

The front is held to a tighter split than the back at every grade.

Corners, at fixed magnification

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

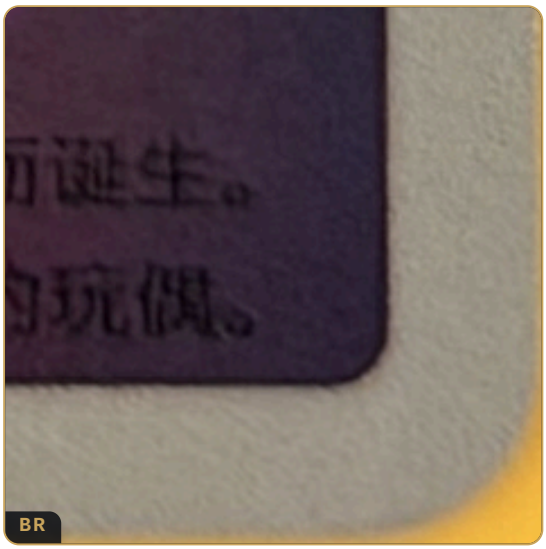

FRONT

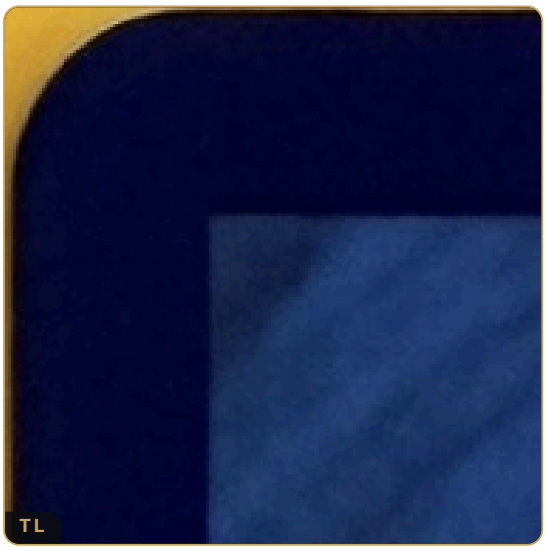

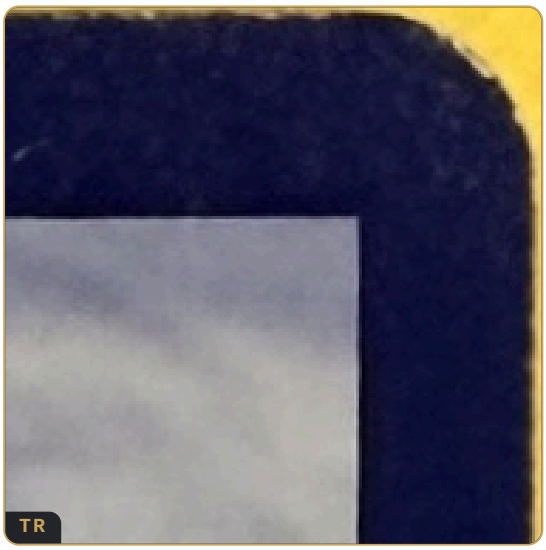

BACK

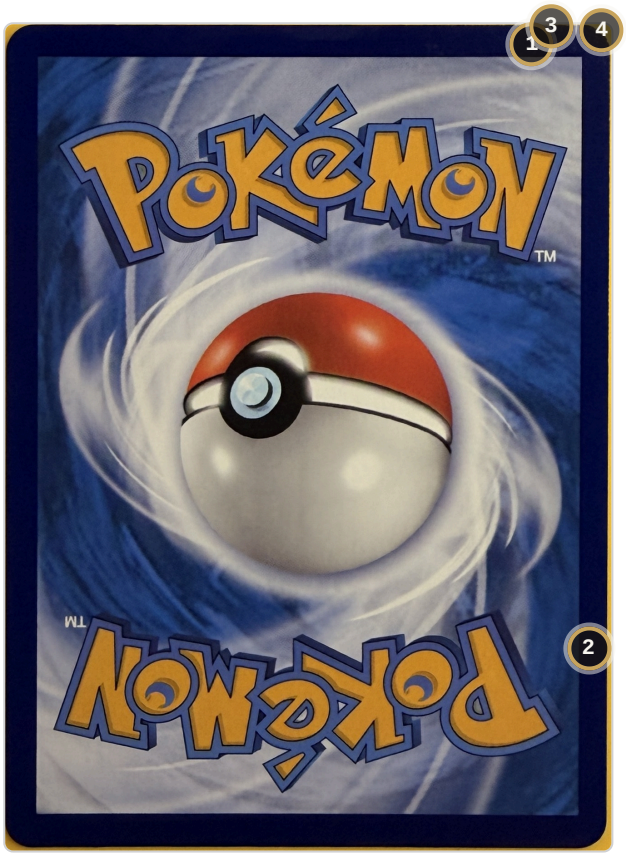

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 3 MARKS PLACED BY THE GRADER

1. **Scratch** NOTICEABLE
   scratch (noticeable)
2. **Scratch** NOTICEABLE
   scratch (noticeable)
3. **Scratch** NOTICEABLE
   scratch (noticeable)

BACK — 4 MARKS PLACED BY THE GRADER

1. **Scratch** FAINT
   scratch (faint)
2. **Surface Scuff** FAINT
   surface scuff (faint)
3. **Edge Chip** NOTICEABLE
   edge chip (noticeable)
4. **Corner Ding** NOTICEABLE
   corner ding (noticeable)

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · whitening** FAINT
  Very faint light speckling along the silver border at the top-left corner tip, visible as a slight break in the grey foil edge.
- **front · surface scuff** FAINT
  Faint diffuse scuffing/haze across the reverse-holo pattern in the mid-card ability text area, showing as uneven sheen rather than clean gloss.
- **back · edge chip** FAINT
  Small lighter pinpoint along the bottom edge of the dark blue border, left of centre, suggesting a tiny nick in the ink.
- **back · corner ding** FAINT
  Top-right corner of the blue back shows a slightly lighter, softened tip compared with the other three corners.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
