Grading report — for the owner of this card

索财灵 (Gimmighoul)

WT-9J5D-QGAE

8.5

NM-MT+

How this grade was reached

A solid card with visible wear. Held back by edges, at 8. Final grade: **8.5 (NM-MT+)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 8.5

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	50.0 / 50.0	60.1 / 39.9	measured by the grader	8.5
back	50.0 / 50.0	50.0 / 50.0	measured by the grader	10

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS 9.5

Handling only. Nothing here shows without looking for it.

EDGES 8

1 ON THE BACK

Light wear, of the kind that shows on close inspection and not before.

SURFACE 8.5

2 ON THE FRONT

Broad diffuse glare bands sit across the holo foil on the front, so much of the surface is not truly assessed; within what is readable there are a couple of faint scuff/scratch impressions on the right and lower artwork, and no dents, creases, or print lines. The back is flat, clean, and evenly glossy.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

```
863 out of 1000 ÷ 100 = 8.63 rounded to the nearest half point =
8.5
```

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	50.0 / 50.0	60.1 / 39.9	60.1 / 39.9	within 65 / 35	8.5
back	50.0 / 50.0	50.0 / 50.0	50.0 / 50.0	within 55 / 45	10

A card is only as well centred as its worse face. Here that is the front, so centering is 8.5.

FRONT: WORST SPLIT	GRADE
52 / 48	10
55 / 45	9.5
60 / 40	9
65 / 35	**8.5** THIS CARD
70 / 30	8
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

BACK: WORST SPLIT	GRADE
55 / 45	**10** THIS CARD
60 / 40	9.5
65 / 35	9
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

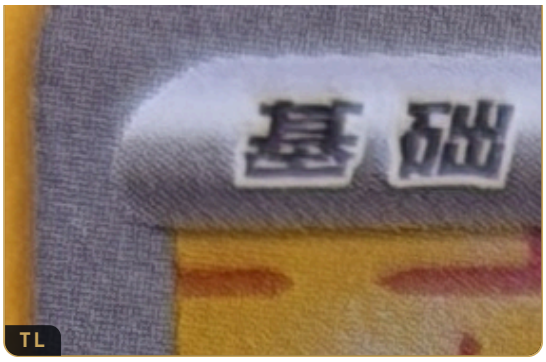

The front is held to a tighter split than the back at every grade.

Corners, at fixed magnification

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 0 MARKS PLACED BY THE GRADER

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · surface scuff** FAINT
  Small light scuff across the yellow coin artwork below the attack box, visible as a dulled patch in the foil.
- **front · holo scratch** FAINT
  Faint fine scratch lines catch the light in the holo foil along the right side of the artwork near the brick background.
- **back · edge chip** FAINT
  Very slight lightening along the blue border at the top-left edge of the back, visible as a thin

pale line.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
