

WinnTCG

Grading report — for the owner of this card

Gwynn

WT-D81X-HZS7

9

MINT

How this grade was reached

A strong card. Held back by centering, at 8.5. Final grade: **9 (Mint)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 8.5

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	61.4 / 38.6	56.2 / 43.8	measured by the grader	8.5
back	52.0 / 48.0	51.2 / 48.8	measured by the grader	10

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS 9

The card is photographed inside a loose penny sleeve, so the sleeve's rounded corners overlap the card's own and no corner can be inspected at full magnification. What is visible shows dark borders running to sharp points with no whitening or rounding on either face, so I have set a conservative 9 rather than a 9.5/10 the images cannot support.

EDGES 9

The sleeve edge sits just outside the card edge on all four sides and softens the outline, so faint edge whitening or micro-chipping cannot be resolved at this resolution. The dark navy back border and the dark front border both look clean and unbroken, which supports a high grade but not a flawless one.

SURFACE 9

2 ON THE FRONT · 1 ON THE BACK

Rainbow glare and diffuse reflections cover most of the front holo, and the card is still sleeved, so no raking-light pass over the foil was possible; fine hairlines and print lines would be invisible here. Within that limit the back is clean and glossy with no creases or stains, and the front shows only ambiguous light streaks near the top border and across the mid-panel foil.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

> 888 out of 1000 ÷ 100 = 8.88 rounded to the nearest half point = **9**

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	61.4 / 38.6	56.2 / 43.8	61.4 / 38.6	within 65 / 35	8.5
back	52.0 / 48.0	51.2 / 48.8	52.0 / 48.0	within 55 / 45	10

A card is only as well centred as its worse face. Here that is the front, so centering is 8.5.

FRONT: WORST SPLIT	GRADE
52 / 48	10
55 / 45	9.5
60 / 40	9
65 / 35	**8.5** THIS CARD
70 / 30	8
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

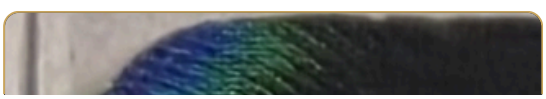

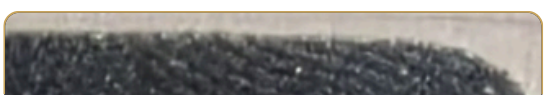

BACK: WORST SPLIT	GRADE
55 / 45	**10** THIS CARD
60 / 40	9.5
65 / 35	9
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

The front is held to a tighter split than the back at every grade.

Corners, at fixed magnification

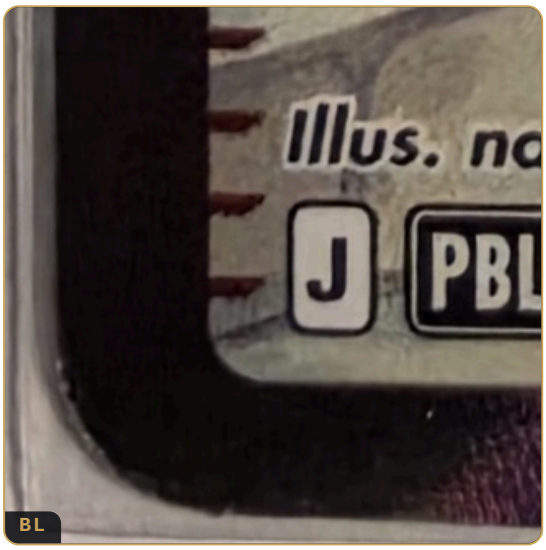

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

FRONT

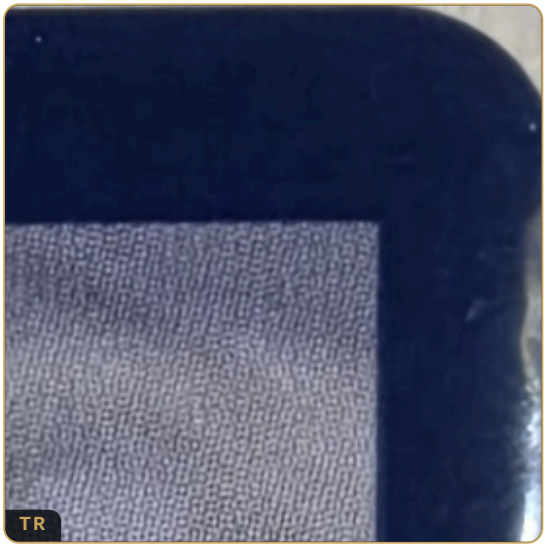

BACK

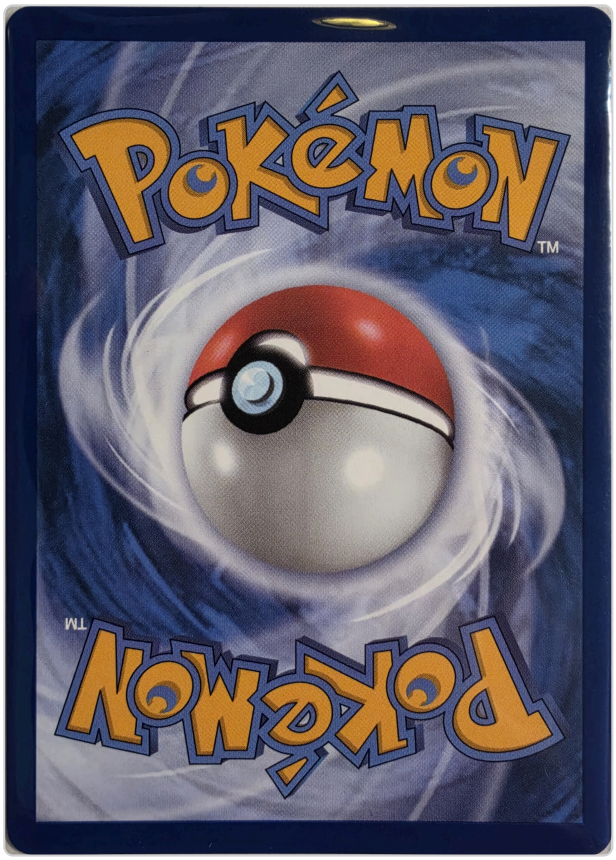

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 0 MARKS PLACED BY THE GRADER

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · dent** FAINT
  A bright irregular light streak sits over the holo just left of 'TRAINER' near the top border; it may be a shallow dent or sleeve wrinkle rather than pure glare.

- **front · holo scratch** FAINT
  Fine light-catching lines run diagonally across the holo foil over the brick background right of the character's hair.
- **back · surface scuff** FAINT
  A small yellow-tinged bright spot on the dark blue border above the Pokemon logo, most likely a sleeve reflection but possibly a light surface mark.

Card details

A card of this name and number, out of **84**, exists in the public card catalogue — **Pitch Black**, Ultra Rare. The details on this certificate match it.

> **This is not a test of authenticity.** It confirms the card is the card it claims to be. A good counterfeit of a real card would match exactly the same way, and the tests that would settle it (light through the core, weight, thickness, surface texture) are laboratory tests, and WinnTCG does not run them. We had this card in our hands and graded what we could see; that is not a statement that it is genuine.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
