

WinnTCG

Grading report — for the owner of this card

Machamp GX

WT-M5QC-7ASJ

7

NM

How this grade was reached

A card with clear handling. Held back by edges, at 2.5. Final grade: **7 (NM)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 8.5

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	50.9 / 49.1	64.2 / 35.8	measured by the grader	8.5
back	50.8 / 49.2	56.7 / 43.3	measured by the grader	9.5

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS 7.5

Wear that shows plainly on inspection, without magnification.

EDGES 2.5

1 ON THE FRONT · 8 ON THE BACK

Severe damage on this axis.

SURFACE 9.5

2 ON THE FRONT · 6 ON THE BACK

Handling only. Nothing here shows without looking for it.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

> 700 out of 1000 ÷ 100 = 7 rounded to the nearest half point = **7**

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	50.9 / 49.1	64.2 / 35.8	64.2 / 35.8	within 65 / 35	8.5
back	50.8 / 49.2	56.7 / 43.3	56.7 / 43.3	within 60 / 40	9.5

A card is only as well centred as its worse face. Here that is the front, so centering is 8.5.

FRONT: WORST SPLIT	GRADE
52 / 48	10
55 / 45	9.5
60 / 40	9
65 / 35	**8.5** THIS CARD
70 / 30	8
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

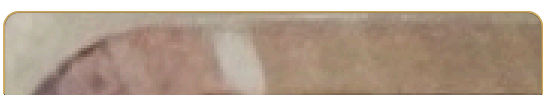

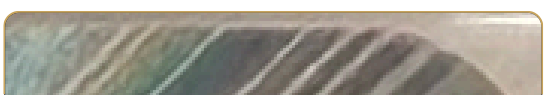

BACK: WORST SPLIT	GRADE
55 / 45	10
60 / 40	**9.5** THIS CARD
65 / 35	9
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

The front is held to a tighter split than the back at every grade.

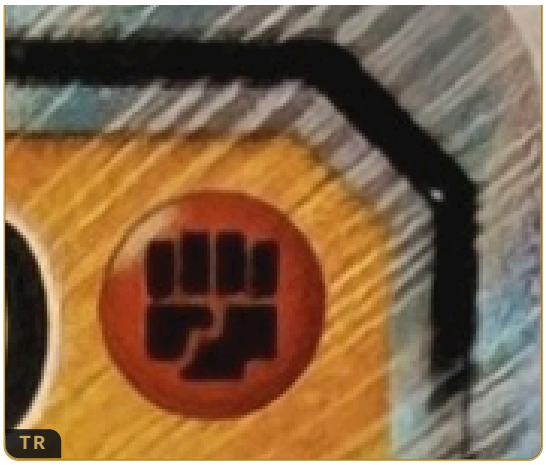

Corners, at fixed magnification

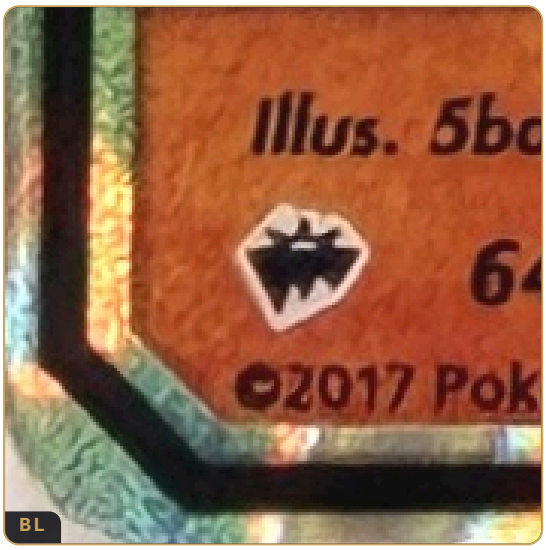

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

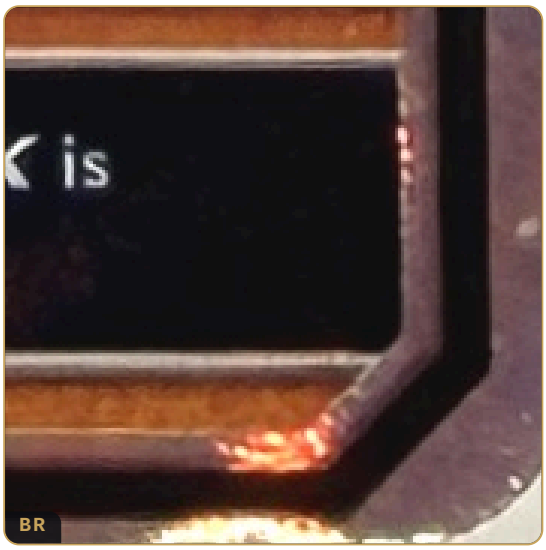

FRONT

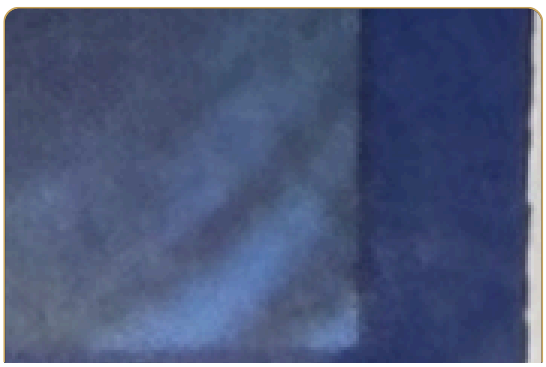

BACK

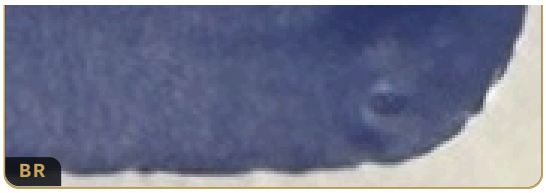

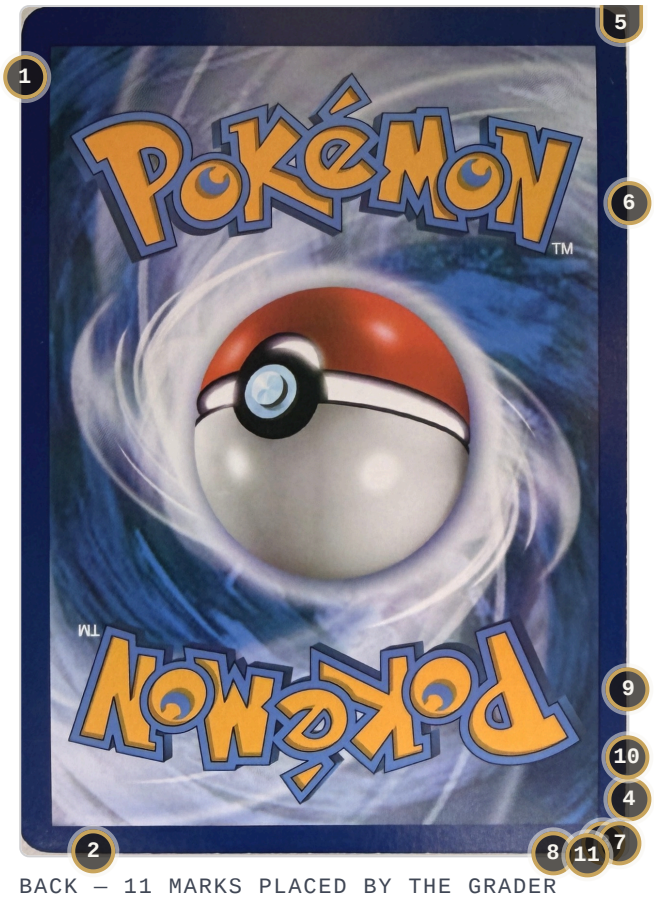

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 11 MARKS PLACED BY THE GRADER

1. **Whitening** FAINT

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · surface scuff** FAINT
  Slight dulling in the foil across the Muscle Punch GX attack bar, consistent with light handling scuff on the textured full-art surface.
- **front · edge chip** FAINT
  Very small break in the silver border line along the top edge left of the Machamp GX title, under 1mm.
- **front · holo scratch** FAINT
  Short fine line about 2mm long in the holo foil near the HP 250 text, catching light differently to the surrounding pattern.
- **back · whitening** FAINT
  Intermittent light flecking along the left border of the back, visible as tiny pale nicks against the navy about a third of the way down.
- **back · whitening** FAINT
  Top-left corner of the dark blue back shows a small pale spot roughly 1mm across where the border colour is lifted.
- **back · surface scuff** FAINT
  Diffuse lighter haze across the upper-centre of the back above the POKEMON wordmark, reading as a broad shallow scuff rather than gloss.

Card details

A card of this name and number, out of **147**, exists in the public card catalogue — **Burning Shadows**, SR. The details on this certificate match it.

That printing is illustrated by **5ban Graphics**, published **2017-08-04**. Both come from the public catalogue, not from WinnTCG.

> **This is not a test of authenticity.** It confirms the card is the card it claims to be. A good counterfeit of a real card would match exactly the same way, and the tests that would settle it (light through the core, weight, thickness, surface texture) are laboratory tests, and WinnTCG does not run them. We had this card in our hands and graded what we could see; that is not a statement that it is genuine.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
