Grading report — for the owner of this card

Accelgor

WT-MRY3-9G78

9

MINT

How this grade was reached

A strong card. Held back by edges, at 8.5. Final grade: **9 (Mint)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 9.5

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	52.5 / 47.5	50.3 / 49.7	measured by the grader	9.5
back	50.9 / 49.1	54.7 / 45.3	measured by the grader	10

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS 9.5

2 ON THE BACK

Handling only. Nothing here shows without looking for it.

EDGES 8.5

6 ON THE BACK

A small white nick interrupts the blue border on the right edge of the back, which is the kind of flaw visible at a glance once pointed out; the remaining edges look clean, though a flat scan cannot resolve light silvering along the dark blue border reliably.

SURFACE 9

1 ON THE FRONT · 1 ON THE BACK

No raking-light photograph is available, so fine scratches, dents and loss of gloss on the holo foil cannot be assessed; what is visible is a clean holo with even colour and no scuffing or staining, with only one faint suspected line in the upper-right artwork. The number reflects an apparently clean face that has not been stress-lit.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are combined at fixed weights: centering 30%, corners 23.4%, edges 23.3% and surface 23.3%. A mark the grader pinned takes points off the axis it sits on.

> 921 out of 1000 ÷ 100 = 9.21 rounded to the nearest half point = **9**

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	52.5 / 47.5	50.3 / 49.7	52.5 / 47.5	within 55 / 45	9.5
back	50.9 / 49.1	54.7 / 45.3	54.7 / 45.3	within 55 / 45	10

A card is only as well centred as its worse face. Here that is the front, so centering is 9.5.

FRONT: WORST SPLIT	GRADE
52 / 48	10
55 / 45	**9.5** THIS CARD
60 / 40	9
65 / 35	8.5
70 / 30	8
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

BACK: WORST SPLIT	GRADE
55 / 45	**10** THIS CARD
60 / 40	9.5
65 / 35	9
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

The front is held to a tighter split than the back at every grade.

Corners, at fixed magnification

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

FRONT

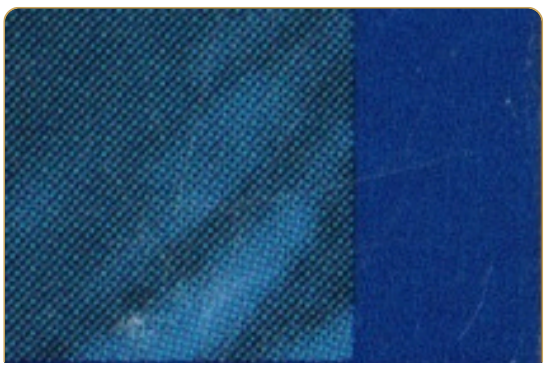

BACK

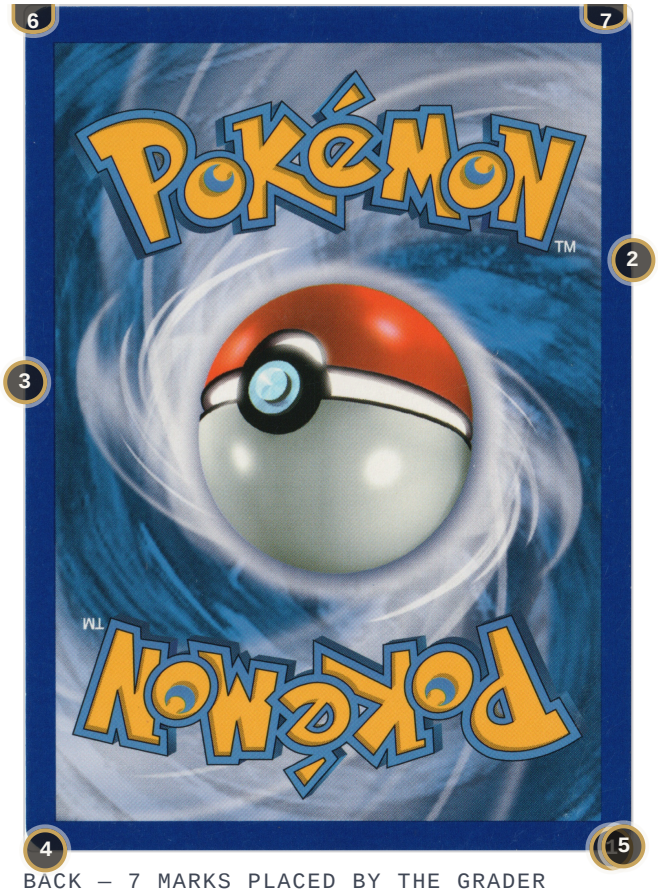

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 7 MARKS PLACED BY THE GRADER

1. **Edge Chip** FAINT
   edge chip (faint)
2. **Edge Chip** NOTICEABLE
   edge chip (noticeable)
3. **Edge Chip** VERY FAINT
   edge chip (very_faint)
4. **Edge Chip** FAINT

5. **Edge Chip** FAINT
   edge chip (faint)
6. **Corner Ding** VERY FAINT
   corner ding (very_faint)
7. **Corner Ding** VERY FAINT
   corner ding (very_faint)

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · print line** FAINT
  Faint thin diagonal line in the holo shards at the upper right of the

artwork, below the HP box.

- **back · whitening** FAINT
  Faint light speckling along the blue border near the top-right corner, suggesting very slight edge wear.
- **back · edge chip** NOTICEABLE
  Small white nick breaking the blue border on the right edge, roughly level with the 'TM' beside the top Pokemon logo.

Card details

A card of this name and number, out of **101**, exists in the public card catalogue — **Noble Victories**, R. The details on this certificate match it.

That printing is illustrated by **Kagemaru Himeno**, published **2011-11-16**. Both come from the public catalogue, not from WinnTCG.

> **This is not a test of authenticity.** It confirms the card is the card it claims to be. A good counterfeit of a real card would match exactly the same way, and the tests that would settle it (light through the core, weight, thickness, surface texture) are laboratory tests, and WinnTCG does not run them. We had this card in our hands and graded what we could see; that is not a statement that it is genuine.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
