Grading report — for the owner of this card

# □□□ (Butterfree)

WT-R3SE-ZFCA

# 10

GEM MINT

## How this grade was reached

A flawless card on every axis measured. Held back by edges, at 9.5. Final grade: **10 (Gem Mint)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

### CENTERING 10

MEASURED, NOT ESTIMATED

| FACE | LEFT / RIGHT | TOP / BOTTOM | METHOD | GRADE |
|---|---|---|---|---|
| front | 51.0 / 49.0 | 51.1 / 48.9 | measured by the grader | 10 |
| back | 51.0 / 49.0 | 52.0 / 48.0 | measured by the grader | 10 |

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

### CORNERS 10

Nothing on this axis shows at the magnification the card was graded at.

### EDGES 9.5

2 ON THE BACK

Handling only. Nothing here shows without looking for it.

### SURFACE 10

2 ON THE FRONT · 1 ON THE BACK

Nothing on this axis shows at the magnification the card was graded at.

## How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

> 988 out of 1000 ÷ 100 = 9.88 rounded to the nearest half point = **10**

## Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

| FACE | LEFT / RIGHT | TOP / BOTTOM | WIDER SPLIT | TABLE RUNG | GRADE |
|---|---|---|---|---|---|
| front | 51.0 / 49.0 | 51.1 / 48.9 | 51.1 / 48.9 | within 52 / 48 | 10 |
| back | 51.0 / 49.0 | 52.0 / 48.0 | 52.0 / 48.0 | within 55 / 45 | 10 |

Both faces measured 10, so that is the centering sub-grade.

| FRONT: WORST SPLIT | GRADE |
|---|---|
| **52 / 48** | **10** THIS CARD |
| 55 / 45 | 9.5 |
| 60 / 40 | 9 |
| 65 / 35 | 8.5 |
| 70 / 30 | 8 |
| 75 / 25 | 7 |
| 80 / 20 | 6 |
| 85 / 15 | 5 |
| 90 / 10 | 4 |
| 95 / 5 | 2 |
| any split | 1 |

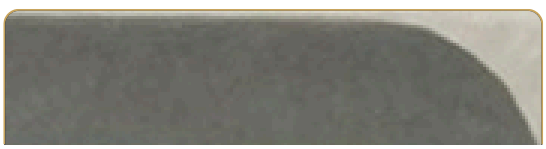

| BACK: WORST SPLIT | GRADE |
|---|---|
| **55 / 45** | **10** THIS CARD |
| 60 / 40 | 9.5 |
| 65 / 35 | 9 |
| 70 / 30 | 8.5 |
| 75 / 25 | 8 |
| 80 / 20 | 7 |
| 85 / 15 | 6 |
| 90 / 10 | 5 |
| 95 / 5 | 3 |
| any split | 2 |

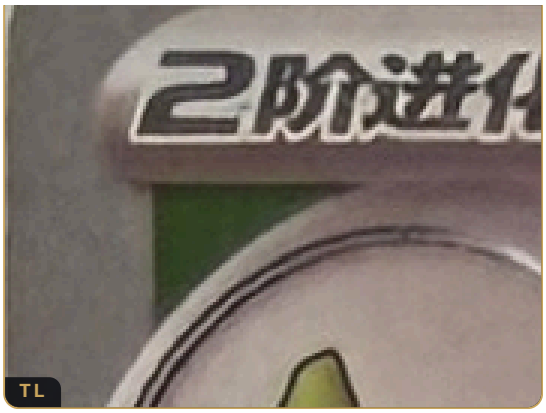

The front is held to a tighter split than the back at every grade.

## Corners, at fixed magnification

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

FRONT

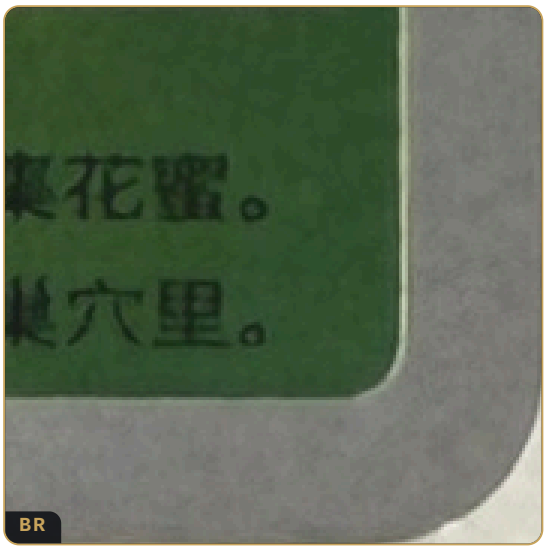

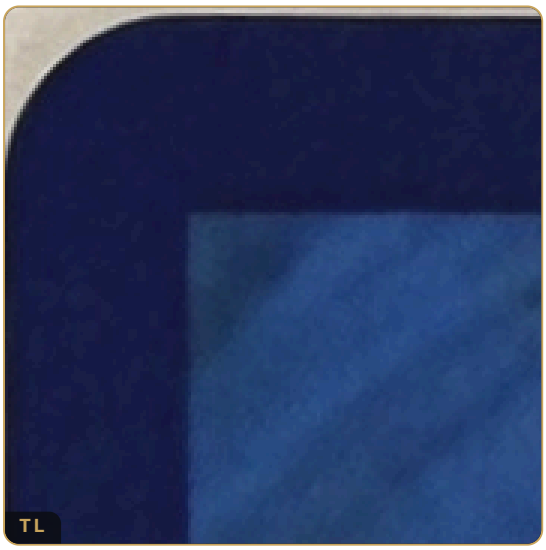

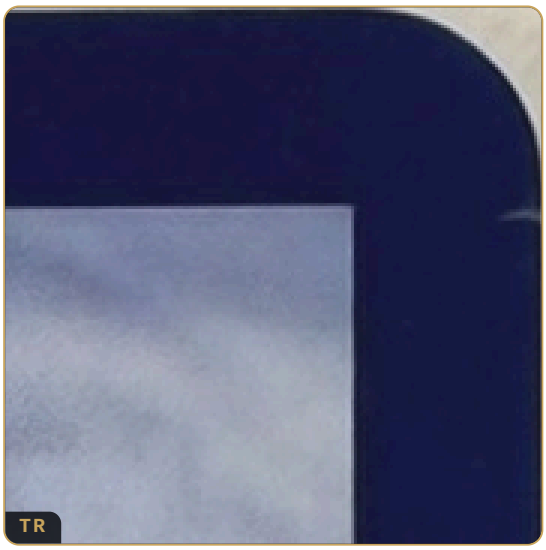

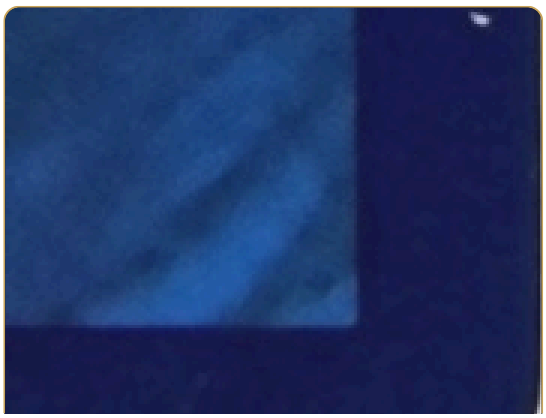

BACK

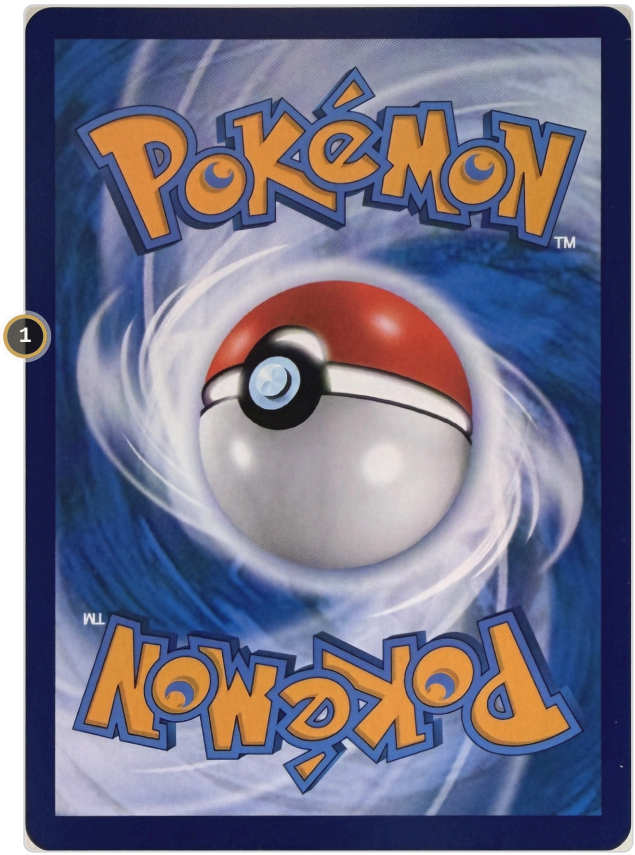

## What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 1 MARK PLACED BY THE GRADER

1. **Edge Chip** FAINT
   edge chip (faint)

## Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · print line** FAINT
  A thin lighter streak runs through the green panel just left of the HP 130 text, consistent with a light print/roller line.

- **front · surface scuff** FAINT
  A faint dull patch crosses the foil '151' watermark in the attack text area; may be reflection rather than a true scuff.
- **back · whitening** FAINT
  The top-left corner tip of the blue border shows a very small pale point, roughly 0.5mm, against the otherwise solid dark blue.
- **back · edge chip** FAINT
  Along the left edge of the dark blue border there are one or two pinpoint light specks under 0.5mm where the blue ink looks interrupted.

## What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
