Grading report — for the owner of this card

□□□VMAX (Drednaw)

WT-X35E-6T6E

7

NM

How this grade was reached

A card with clear handling. Held back by surface, at 2. Final grade: **7 (NM)**.

Four axes are graded separately. The overall grade is computed from them, never typed over them. Centering is measured rather than judged, so it is shown as geometry; the other three carry the grader's reading of the card.

CENTERING 9

MEASURED, NOT ESTIMATED

FACE	LEFT / RIGHT	TOP / BOTTOM	METHOD	GRADE
front	53.7 / 46.3	55.2 / 44.8	measured by the grader	9
back	53.2 / 46.8	51.4 / 48.6	measured by the grader	10

Ratios are the card's border widths, not an estimate from eye. The grade follows a fixed tolerance table, so the same measurement always gives the same number.

CORNERS 9

All four corners read as pointed on both faces with no rounding or fraying at this resolution; only the bottom-left back corner tip shows a hint of lightening, and the front top-left border carries faint speckling. Close-up corner shots would be needed to confirm nothing finer is present.

EDGES 8.5

1 ON THE BACK

The dark front border and blue back border show a couple of faint pale interruptions - top-left front and mid-left back - consistent with light handling wear, but the images are not high enough resolution to resolve fine edge whitening along the full perimeter, so this number could move either way with a raking-light pass on the edges.

SURFACE 2

2 ON THE FRONT · 5 ON THE BACK

Severe damage on this axis.

How it was graded

1. **Graded in hand.** The card was on our bench, and we photographed it front and back under controlled light. The photographs show which card this is and where anything we marked sits on it.
2. **Centering measured.** The border widths were measured by the grader, who drew the border lines by hand, and a fixed table turns the measurement into a grade. The same split always gives the same number.
3. **Corners, edges and surface read.** An AI takes the first pass on each. A person confirms or overrides every sub-grade before anything is recorded, and pins any mark they find on the photograph.
4. **The overall grade is arithmetic.** Nobody types it. The sub-grades make a score out of 1000, and the grade is that score over a hundred, rounded to the nearest half point.

The four sub-grades are averaged, each counting equally.

> 713 out of 1000 ÷ 100 = 7.13 rounded to the nearest half point = **7**

Centering, in detail

Each face is measured twice: left against right, and top against bottom. The wider of the two splits is the one that counts, and the table below turns it into a grade.

FACE	LEFT / RIGHT	TOP / BOTTOM	WIDER SPLIT	TABLE RUNG	GRADE
front	53.7 / 46.3	55.2 / 44.8	55.2 / 44.8	within 60 / 40	9
back	53.2 / 46.8	51.4 / 48.6	53.2 / 46.8	within 55 / 45	10

A card is only as well centred as its worse face. Here that is the front, so centering is 9.

FRONT: WORST SPLIT	GRADE
52 / 48	10
55 / 45	9.5
60 / 40	**9** THIS CARD
65 / 35	8.5
70 / 30	8
75 / 25	7
80 / 20	6
85 / 15	5
90 / 10	4
95 / 5	2
any split	1

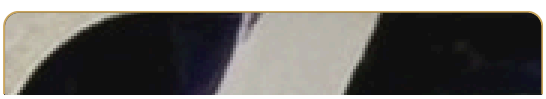

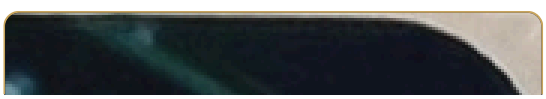

BACK: WORST SPLIT	GRADE
55 / 45	**10** THIS CARD
60 / 40	9.5
65 / 35	9
70 / 30	8.5
75 / 25	8
80 / 20	7
85 / 15	6
90 / 10	5
95 / 5	3
any split	2

The front is held to a tighter split than the back at every grade.

Corners, at fixed magnification

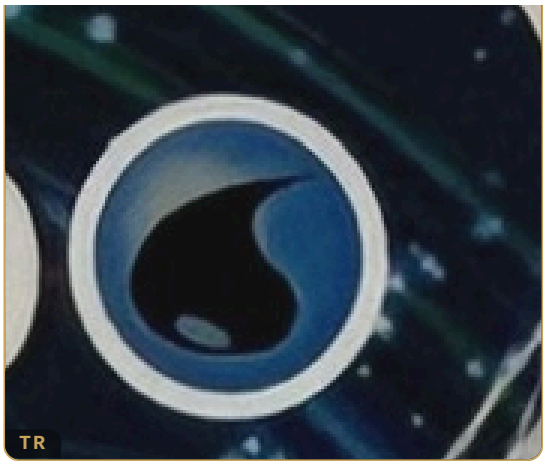

Each corner is shown over a 9mm square at **30 pixels per millimetre** — the same magnification on every card this bench grades, so a corner here means what it meant on the last one. These are crops of the photographs above, not separate shots.

What the grader marked

Numbered pins are where a person looked and found something. They are placed by hand on the photograph, to show where on the card each one is.

FRONT — 0 MARKS PLACED BY THE GRADER

BACK — 3 MARKS PLACED BY THE GRADER

1. **Surface Scuff** PROMINENT
   surface scuff (prominent)
2. **Surface Scuff** PROMINENT
   surface scuff (prominent)
3. **Indentation** PROMINENT
   indentation (prominent)

Also observed

Recorded during the first pass and reviewed by the grader. These carry no position — they describe a region, not a point, which is why they are not pinned above.

- **front · whitening** FAINT
  Faint light speckling along the top-left border where the dark holo frame meets the edge, roughly 3-4mm long, visible against the black background.
- **front · surface scuff** FAINT
  Short diffuse scuff/gloss disturbance about 2mm across on the holo just left of the Pokemon's chest plate, reads as a dulled streak rather than glare.
- **back · whitening** FAINT
  Very slight lightening of the blue border at the bottom-left corner tip on the back.
- **back · edge chip** FAINT
  Thin pale interruption in the dark blue border along the left edge at mid-height on the back, about 2mm long.
- **back · stain** FAINT
  Tiny dark speck under 1mm in the blue border near the top-left corner of the back, above the Pokemon logo.

What this report is, and is not

WinnTCG graded this card **in hand**, on the bench. **The card was in our hands**, and we sealed the case ourselves. We photographed it here under controlled light to show which card is in the case and where anything we marked sits on it. The grade was made with the card in hand, so it rests on more than the photographs in this report can show.

This document is yours. It is not published with the certificate, and the public page shows the grade and the photographs without it.
